

# Crystal Therapy for Reflexologists

## *Crystal Therapy for Reflexologists*

Crystal reflexology refers to the technique of gently kneading the reflexes parts of the feet by the use of a crystal wand in order to improve balance, circulation and the natural healing abilities in an individual. Crystal reflexology is a very ancient technique that is practiced based on the belief that the parts of a body can be stimulated and rebalanced by massaging the corresponding areas of the feet and hands appropriately. Crystal reflexology can be used to relax, to treat minor issues and to treat certain illnesses or health conditions. Crystal reflexology can also be used to rebalance the main chakras that are located along the inner side of the foot.
